

OUR CAPABILITIES

Adcour is a premier supplier of custom designed and built-to-print battery packs to the military, oceanographic, medical, aerospace and industrial markets. With expertise in alkaline, NiCd, NiMH and lithium chemistries, we have the capability to manufacture solutions for any application requiring a portable power solution.

Our sales, engineering and production personnel work closely with customers to design, build and manage complex, high performance solutions to meet their often strict and environmentally demanding requirements.

Whatever your requirements, our team can design a safe, reliable, cost-effective solution to suit your needs and to make sure the end product meets or exceeds your size, weight & runtime expectations.

We are also able to provide quick turnaround of sample packs to assure your battery is configured and performs as required. Once your design is finalized, Adcour will work with your purchasing and logistics departments to forecast your requirements and set up buffer stock or a VMI program so you will get the power you need, when you need it.

Contact us today with your requirements, and our sales & engineering team will respond quickly to help you get started.

ADCOUR AT A GLANCE...

- *50 years of industry experience*
- *All major battery chemistries*
- *In-house battery application engineering expertise*
- *State-of-the-art equipment in a newly renovated & expanded facility*
- *Build-to-print assemblies*
- *High-quality product*
- *Cost effective solutions*
- *Quick-turn samples for testing*
- *VMI programs for JIT delivery*
- *Personalized attention*
- *Responsive customer service*

KEY ADVANTAGES

- **ISO 9001:2015 Certified**
- **U.S. SBA Certified Woman-Owned Small Business (WOSB)**
- **All assemblers J-STD-001 trained & Certified IPC Specialists (CIS)**
- **AS9100C Compliant**
- **RoHS Compliant**
- **ITAR Compliant**
